ENERGY SMART PLUS

Manual dispenser with
heated plate

Description

The **manual tray dispenser with a heated plate** offers a practical and versatile solution for food packaging, ensuring efficiency, safety, and durability.

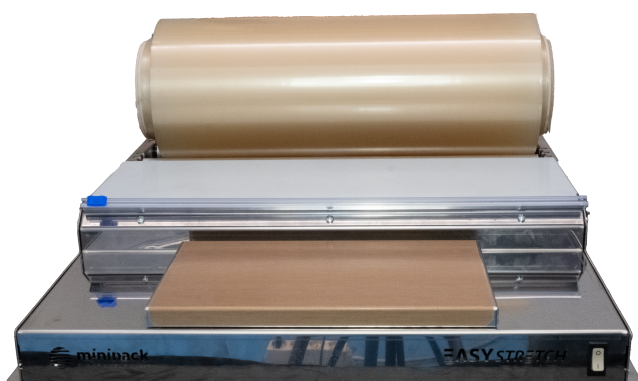

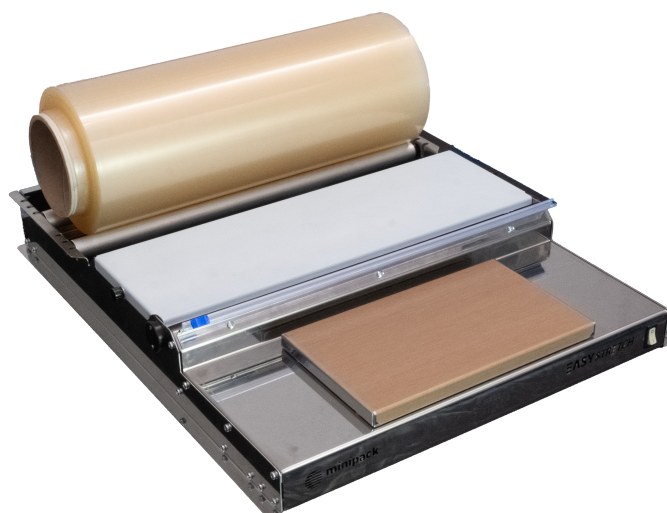

Ideal for restaurants, catering services, cafeterias, and supermarkets, it enhances productivity and provides professional and hygienic packaging for food products.

Plus

- **Operational Efficiency:** Reduces the time needed for packaging, enhancing efficiency in the kitchen or food department.
- **Versatility:** Suitable for use in various settings, including large retail chains, professional kitchens, and small grocery stores.
- **Safety:** The robust construction and safe cutting system reduce the risk of injury during use.
- **Cost-Effectiveness:** An economical solution for food packaging that helps reduce waste and improve product presentation.

Main Features

- **Ergonomic Design:** Designed for comfortable, effortless use, the dispenser fits perfectly in the hand, reducing fatigue during prolonged use.
- **High-Quality Materials:** Made from durable stainless steel and resilient plastic materials, it ensures durability and corrosion resistance.
- **Universal Compatibility:** Suitable for a wide range of tray sizes and materials, including plastic, aluminum, and biodegradable trays.
- **Easy Adjustment:** Simple to adjust for various roll and tray sizes, making the packaging process more flexible and versatile.
- **Precise Cutting System:** Equipped with a sharp blade that ensures a clean, precise cut of the film, preventing material waste.
- **Easy to Clean:** The detachable design allows for quick and thorough cleaning, maintaining high hygiene standards.

Technical Features

- Maximum installed power: 1.85kW
- Electrical supply: 220-230V
- Film tension clutch included
- Adjustable film roll support rollers
- Cold film cutting with mounted device
- Usable roll width: 450mm
- Roll outer diameter: 50mm to 250mm
- European stainless steel, 1.5mm thickness
- Dimensions (LxWxH): 535x640x110mm
- Weight: 8.5Kg
